

GALGOTIAS UNIVERSITY CREATIVITY AND OUT OF THE BOX THINKING IS ESSENTIAL IN A 21ST CENTURY CLASSROOM

Life will always test us, challenge us and seek answers from us - no matter which stage of our lives we are in. It's for us to show our mettle, our resolve, our preparedness. It's in this light I see exams as a platform from where students can see for themselves, and show the world what they're made of.

As students get ready for their X and XII Board Exams results, let me take this opportunity to wish all of them the very best. I am confident that your hard work will pay dividend and you all will pass your first major challenge with flying colours.

Just believe in yourself.

Today, as you stand at an important juncture in your life, it would be worth your moment to understand the importance of education in our lives. In the words of Nelson Mandela, "it's the most powerful weapon which you can use to change the world." At Galgotias University, we recognize this power to develop and nurture young minds for making our world a better place to live. That's why it's our endeavour to provide students with a deeply transformative experience - intellectually, socially and personally - that will prepare them for a life of citizenship and leadership. I have tremendous faith in the power of our youth to become idea leaders. Tomorrow when you step out to become the leaders of change, I'm convinced you'll be driving our global future by advancing discoveries, broadening knowledge, fostering entrepreneurship, protecting and sustaining our natural environment, and developing new technologies.

Having said that, I also recognize the importance of living in the present moment and the significance of doing well in these exams as your first stepping stone towards achieving the goals and milestone you have set for yourself.

So let me, once again, wish you the very best for these upcoming exam results and remember, success doesn't happen to you - it happens because of you.

SUNEEL GALGOTIA
Chancellor, Galgotias University
